## *ALBEMARLE COUNTY OFFICE BUILDING COMPUTER ROOM HVAC REPLACEMENT*

The existing Computer room Liebert units at the Main County Office Building for Albemarle County were recently replaced. The existing 10 ton and 3 ton units were replaced in kind. A new 10 ton down flow unit was also installed to allow for redundancy in the main room. The existing 10 ton was not replaced until the new unit was in operation so that the Computer room did not experience any down time during the construction. All of the new indoor units have humidifiers and reheat capability. The new air cooled condensers were located adjacent to the room on grade. A new electrical panel was installed to serve all units so they could be put on an emergency generator at a later date. The contractor was on site for four weeks to install all work.
