

# *SRP PROJECT of the MONTH*

---

## *CULPEPER EMERGENCY OPERATIONS CENTER*

Culpeper County recently completed the construction of their new 911 call center and emergency response command center. The facility contains the 911 dispatch consoles, associated staff support areas, and a separate large meeting room where an emergency response command post can be set up complete with under floor power and data hookups already in place. The 911 center has a raised access floor and redundant HVAC systems. An 800 amp electrical service is partially backed up by a 250 KW generator. An extensive external grounding ring circles the entire building and Monopole located at the rear. The critical areas are protected by a FM-200 fire suppression system.
