---

## *SCOTTSVILLE ELEMENTARY SCHOOL*

The Chiller Plant at Scottsville Elementary School, located in Scottsville, Va., was recently renovated to address maintenance and noise concerns. The existing Chiller was located inside the mechanical room with a remote air cooled condenser locate outside at grade. Due to Scottsville's remote location in the County, having to maintain two pieces of equipment was no longer desired. A new 60 ton air cooled chiller was installed on the existing air cooled condenser pad to address this issue. The space in the mechanical room was left open to service the Boiler and dual temperature pumps which remained. Locating the chiller outside also made for a quieter environment inside the school. All work was done during the summer 2007 break.
