

SRP PROJECT of the MONTH

THOMAS JEFFERSON HIGH SCHOOL

Thomas Jefferson High School is located in Richmond, Virginia and opened for classes in 1930. Simmons, Rockecharlie, and Prince recently completed the design for the replacement of the Boiler and Pump system, the Media Center Air Conditioning System, and the Basement level Heating and Ventilating Unit. The new system includes two new 6000 MBH Flex Tube Boilers, 2 Primary Pumps, 4 Secondary Pumps and new Honeywell DDC controls. Infill of the existing Boiler room pit with concrete was also included in the project. The Media Center dual duct air conditioning system was replaced with a new 4 pipe fan coil unit system concealed above a new ceiling. The Basement level H&V Unit was replaced with a new double wall unit and a new pump for freeze protection along with new DDC controls.
